

Yeah first it is the weather and traffic, whats next? This is bull. why cant the people who put in petition 04-160 make there business better instead of wasting money on trying to stop another business (XM Radio) from providing there listeners with the service. I listen to the weather alot on my XM Radio, I PAID for the service and expect to still reiceive it in my viechle, home and whereever I want tyo listen to it. Why cant you people worry about somthing really important. If you offered the service, XM wouldnt try to stop you, they would make there service better than yours (oh yeah, it allready is) am, and fm are old and they will allways be around, what are they worried about?
